SUMMARY

Highly motivated and technically adept IT professional, seeking to gain hands-on experience in a collaborative and dynamic setting, aiming to learn and grow in the field of information technology.

SKILLS

Data Structures and Algorithm, Data Analysis, Data visualization, Data integration

AI&ML, TensorFlow, Keras, PyTorch, Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn

Python, Java, C/C++, MySQL, PostgreSQL, Flask, HTML/CSS

PROJECTS

Job Ordering Management System

- Developed a software application that helps organizations manage their job orders, customer information, product inventory, and employees.
- It's an application that is built using the VB.Net programming language and Microsoft Access database management system, customized to meet the specific needs of an organization.

Employee Master Application

- Employee Master Application has been developed to provide a fully integrated, digital Human Resource Management System solution.
- This application uses the robust capabilities of Python's Flask Web Framework along with MySQL as the backend database to meet the expectations of modern business it incorporates advanced authentication system that guarantee the security of sensitive employee data.

INTERNSHIP

Software Developer Intern

- Completed an internship in safe technologies, worked on computer generated environment quad portal. Assisted in conducting scrum meetings, and coordinated agile ceremonies and documentation for project sprints, enhancing team communication and efficiency in delivering key project milestones.
- Assisted the professionals in developing software applications using java, html, sql. And there by acquired hands-on working with the above-mentioned programming languages.

EDUCATION

Master of Computer Applications | Bangalore University | 2023-Present

Bachelor of Computer Applications | Bharathiar University | 2020-2023

CERTIFICATIONS

Convolution Neural Network: Completed a certification course offered by Great Learning, and covered the concepts of Normalization, Pooling, and NLP.

GitHub Copilot Using Java and MySQL: Completed a mini-project offered by Great Learning using Java and MySQL, created GUI using AWT and logic using Java programming and database using MySQL.
